

Hey Belleville!

We want to hear from you.

The City of Belleville is currently undertaking a Corridor Study for Bell Boulevard and North Front Street, and will hold a second Public Information Centre (PIC) to receive input from the public on the project.

Public Information Centre (PIC) Details:

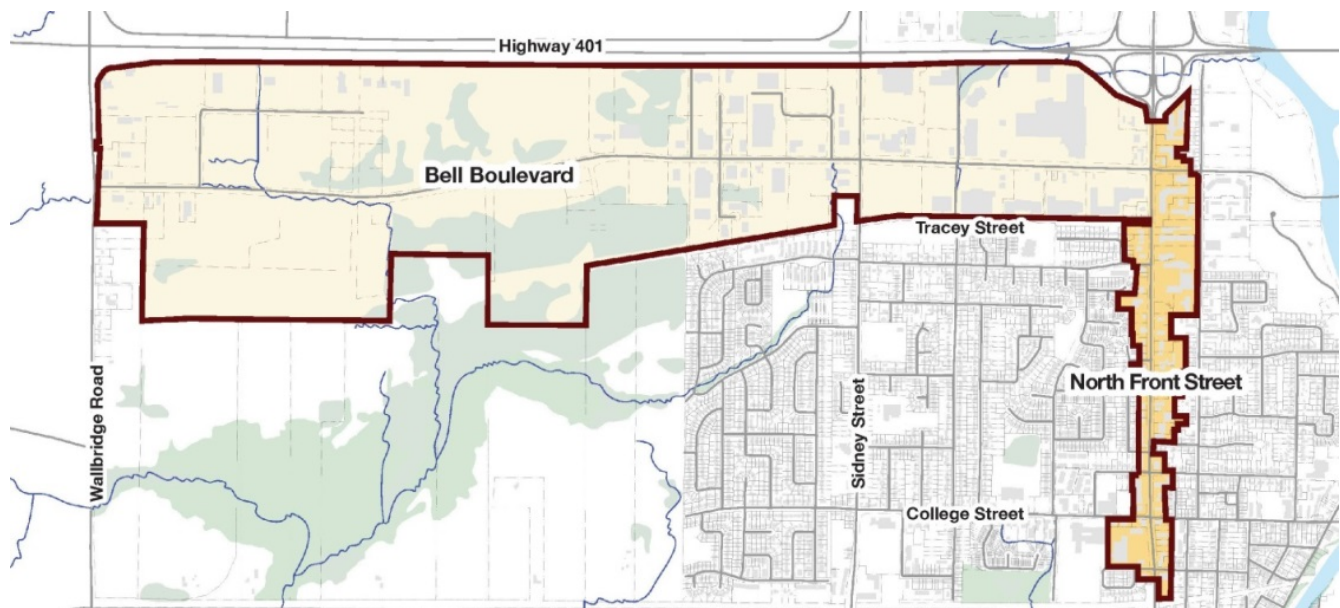

Date: Thursday, September 29, 2022

Time: 7:00 pm to 8:30 pm

Location: City Hall – SMB Room (3rd floor) – 169 Front Street, Belleville

Goal: The goal of the Corridor Study is to understand the specific needs and opportunities in the study area and give the City direction with its current and future development as a mixed use corridor. This direction will contribute to the overall planning vision for the City and will help Belleville make well-informed decisions related to the future of the Bell Boulevard/North Front Street corridor.

Purpose: The purpose of the second PIC is to hear from you! We will provide an overview of the study, proposed land use option and public realm framework, and facilitate a working session to learn about your thoughts and preferences for the area. The City's consultant team will be available for any questions.

To submit your immediate questions on the future of Bell Boulevard and North Front Street, please email planning@belleville.ca. If you can't attend, a recording of the presentation can be found at www.belleville.ca/corridorstudy along with a recording of the first PIC.
